WORK EXPERIENCE

PRESENT

Devops engineer . 1 yrs 5 mos

Banimode . Iran. Tehran . Tehran

JUL 2018

I started my job in Banimode with only two web servers, and our Database server was managed with another company.

After a while, I got Database server and optimized our web server.

Now, We have more than one hundred servers and more than 50 services.

I'm using CentOS, Debian and Ubuntu server in our servers.

Some of services deployed with Docker.

In a period of time I used Docker swarm for Galera.

I used Graylog and ELK stack to manage our application and services logs.

To deploy web applications on Staging server automatically I used Gitlab CI.

I migrated of some services like GlusterFS and some web servers(low priority web servers) to Rancher.

SEP 2018

Webmaster . 1 yrs 2 mos

Magellan Travel . Iran. Tehran

JUL 2017

It was one of my Part time and remote jobs. I was webmaster of Magellan.

In Magellan our server was Windows server 2012 and we used IIS as web server.

I optimized magellan.ir and magellan.org for search engines (SEO).

PRESENT

Server administrator and CTO . 4 yrs 1 mos

Damatajhez . Iran . Tehran

NOV 2015

I started work with Damatajhez.com in 2015 as remote SysAdmin, and in 2016 January I worked as CTO with Damatajhez.

Our team had 3 person and grows up to 8 person.

Plesk, Prestashop, Docker, PHP and CentOS 6 was technologies I used in Damatajhez.

I still working remotely with this company.

JAN 2016

PHP Developer and Server Admin . 7 mos

ParsTelecom . Iran . Tehran

JUN 2015

Developing PHP Scripts and Managing Linux Servers

I learned PHP programming before start my job in Parstelecom and learned it as self study.

When I start my job in the Parstelecom my Job was Linux Sysadmin and after about 2 weeks I started to change PHP scripts as out company needs.

I rewrite some PHP scripts like IOS push notification with Python to find out which provide best performance for us.

JAN 2016

Webmaster and Server manager . 1 yrs 5 mos

Lenzbin . Iran. Tehran

AUG 2014

I deployed a video sharing site with PHPMelody, and I edited most of this CMS pages.

I develop a python script to manage user activities, allow manage videos and users from telegram.

To get some critical reports, I wrote a bash script that sent some critical reports to my email and telegram.

JUN 2015

Server Admin . 6 mos

Fanavari Parsian . Iran . Tehran

DEC 2014

In this company I Managed Dedicated servers, VPS server and Web hostings.

We had more than 5000 clients.

NOV 2014

IDC Technician . 1 yrs 5 mos

Afranet . Iran. Tehran . Tehran

JUN 2013

It's a revolution in my job experience, because I learned some new technologies like VMWare virtualization, Plesk control panel, Smartermail and some monitoring systems.

For some R&Ds, I configured HP servers and Clustered that with vCenter.

I used Windows server 2008 in smarter mail servers and Centos 6 for mail and DNS servers.

JUN 2013

Technical & Network Admin . 5 yrs 1 mos

Infotech . Iran . Tehran

MAY 2008

When I started working at Infotech, I was Card printer operator.

I took a course about POS hardware repair and worked as hardware technical.

I also worked as Help desk.

In that time we had two physical servers with windows server 2003 OS and about hundred clients with Windows XP.
